MERN DEVELOPER

MERN Stack Developer with overall 1 year of hands-on industry experience in building and maintaining production-ready web applications. Skilled in developing scalable React-based user interfaces, managing global state with Redux Toolkit, and integrating secure RESTful APIs using Node.js and Express.js. Experienced in working on real-world enterprise and industrial applications with a strong focus on clean code, performance, and usability.

Technical Skills

Programming Languages: JavaScript (ES6+), HTML5, CSS3,

Frontend: React.js, Redux Toolkit, Tailwind CSS, Ant Design

Backend: Node.js, Express.js, MongoDB, REST APIs

Tools & Platforms: Git, GitHub, Postman, VS Code, Vite

Other Skills: Responsive Design, API Integration, Debugging, Agile Collaboration, Cross-browser compatibility, UI

Experience

Jr Mern Stack Developer | Dynastack Softwares, Ahmedabad

January 2025 – Present

Technologies: React.js, Redux Toolkit, Ant Design, Tailwind CSS, REST API, Node.js, MongoDB

- Contributed to live, production-ready **SaaS and enterprise web applications**.
- Developed reusable and responsive React components using Redux Toolkit and Ant Design.
- Integrated REST APIs and handled frontend–backend data flow using Node.js and Express.js.
- Improved application stability by debugging issues and optimizing component rendering.
- Collaborated with developers and QA in an Agile environment to deliver features on time.

Projects

Employee Management System - React.js, Redux Toolkit, Ant Design, REST API Integration

- Developed a role-based enterprise application for managing employees, attendance, roles, and reports used internally by the organization.
- Implemented CRUD operations using REST APIs for employees and related modules.
- Built reusable React components and handled state using Redux Toolkit.
- Focused on clean UI, form validations, and smooth navigation to improve user experience.

Unmanned & Manned Weighbridge Software - React.js, Redux Toolkit, Tailwind CSS, Ant Design, REST API Integration

- Worked on an industrial-grade unmanned and manned weighbridge system handling real-time operational data.
- Developed dashboards and reports to display **real-time weighing data** from backend APIs.
- Integrated frontend with backend services to ensure accurate data flow and process tracking.
- Gained experience in understanding **real-world system workflows and production constraints**.

Education

BH Gardi College of Engineering and Technology

Bachelor of Technology in Computer Science

2021 – 2025

CGPA: 8.00

Certifications

IBM SkillsBuild – Hands-on AI Training

IUCEE Mini Course – Artificial Intelligence

Additional Information

Languages: English, Hindi, Gujarati, Bengali

Availability: Immediate
